

Mock Politeness in Intensifier Constructions

National Taiwan Normal University, Department of English

Lin, Jung

August, 4-6, 2021

The 16th International Conference on Role and Reference Grammar

York University

Outline

- 1. Introduction
- 2. Methodology
 - 2-1 Framework
 - 2-2 Procedure
- 3. Results and Discussion
- 4. Conclusion

Introduction

Mock politeness example

- [Context: You cut your hair short, and you met your friend.]
- Your friend: But you looked so nice with long hair.
- You:

Mock politeness example

- When the speaker **used a seemingly polite expression** to convey an **underlying impolite meaning**, this utterance is mock polite (Taylor, 2015)
- Surface
- Underlying

Mock politeness example

- 你 真 有禮貌 三字經 還 用 敬語
 - *ni zhen youlimao sanzijing hai yon gjingyu*
 - You truly polite curse even use honorific
 - “How polite you are. You use honorific when you curse.”
-
- | | |
|--|---|
| <ul style="list-style-type: none"> ▪ Surface ▪ The speaker compliments the addressee for being truly polite. | <ul style="list-style-type: none"> ▪ Underlying ▪ Even if addressee really use honorific, the speaker is saying the addressee is still really rude. |
|--|---|

Intensifiers

Semantic meaning (Fang, 2012; J. J. Li, 2003; X. Z. Li, 2011; Shan, 2004)

zhen
'truly'

- 1. Emphasizing something truly exists
- 2. Emphasizing the topic
- 3. Stating something is beyond a certain degree

zhende
'really'

- Emphasizing something truly exists
- Stating something is beyond a certain degree

hen
'very'

- Stating something is beyond average

Examples

- tianqi **zhen** bu cuo
Weather **truly** not bad
- tianqi **zhende** bu cuo
Weather **really** not bad
- Tianqi **hen** bu cuo
Weather **very** not bad
- “The weather is very nice”

Mock politeness example

- 你 真 有禮貌 三字經 還 用 敬語
 - *ni zhen youlimao sanzijing hai yon gjingyu*
 - You truly polite curse even use honorific
 - “How polite you are. You use honorific when you curse.”
- | | |
|--|---|
| <ul style="list-style-type: none"> ▪ Surface ▪ The speaker compliments the addressee for being truly polite. | <ul style="list-style-type: none"> ▪ Underlying ▪ Even if addressee really use honorific, the speaker is saying the addressee is still really rude. |
|--|---|

Research questions

1. Can different intensifiers with similar meanings express different degree of mock politeness?
2. Which of the three intensifiers, *zhen* 'truly', *zhende* 'really' and *hen* 'very', are more frequently used to express mock politeness? Why?

Methodology

■ 1. Framework

- Collecting the intensifier expressions from
 - Academia Sinica Balanced Corpus of Modern Chinese (Sinica Corpus) (Huang & Chen, 2010)
 - Modern Mandarin eight hundred words (Lu, 1999)
 - Google
- **Classifying the intensifiers**

■ 2. Procedure

- Collecting and classifying the intensifier expressions from PTT gossiping board comments
- Analyzing the intensifier constructions in terms of the mock politeness degree

Framework

Table 1.2 *Operators in the layered structure of the clause*

Nuclear operators:

Aspect

Negation

Directionals (only those modifying orientation of action or event without reference to participants)

Core operators:

Directionals (only those expressing the orientation or motion of one participant with reference to another participant or to the speaker)

Event quantification

Modality (root modals, e.g. ability, permission, obligation)

Internal (narrow scope) negation

Clausal operators:

Status (epistemic modals, external negation)

Tense

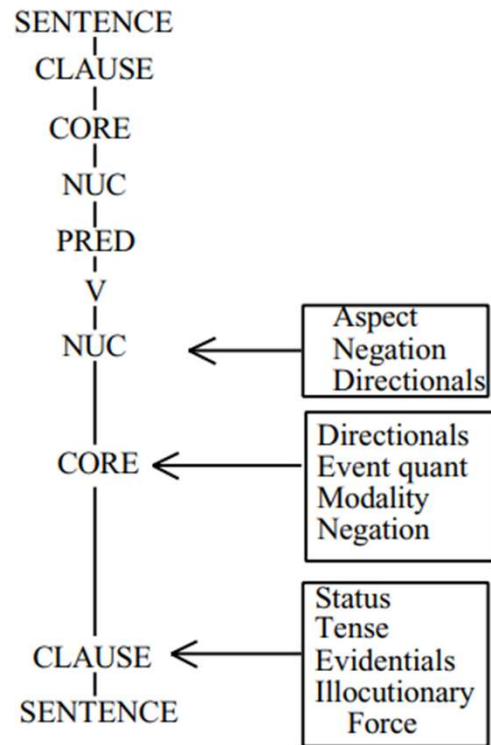

Evidentials

Illocutionary force

Methodology- Framework

- **Operators and adverbs** (Van Valin, 2005)
- Operators are grammatical categories, and their positions in a sentence are usually fixed. (Van Valin, 2005)
- Operators could interact with adverbs. From the ordering of the operators and adverbs, it is possible to see which layer the adverb is modifying. (Fleischhauer, 2016; Van Valin, 2005)

Mandarin operator, *keneng*
 (Fu, 1996)

- 可能, *keneng*
- Possible
- Epistemic modal verb
 (Li & Thompson, 2017)

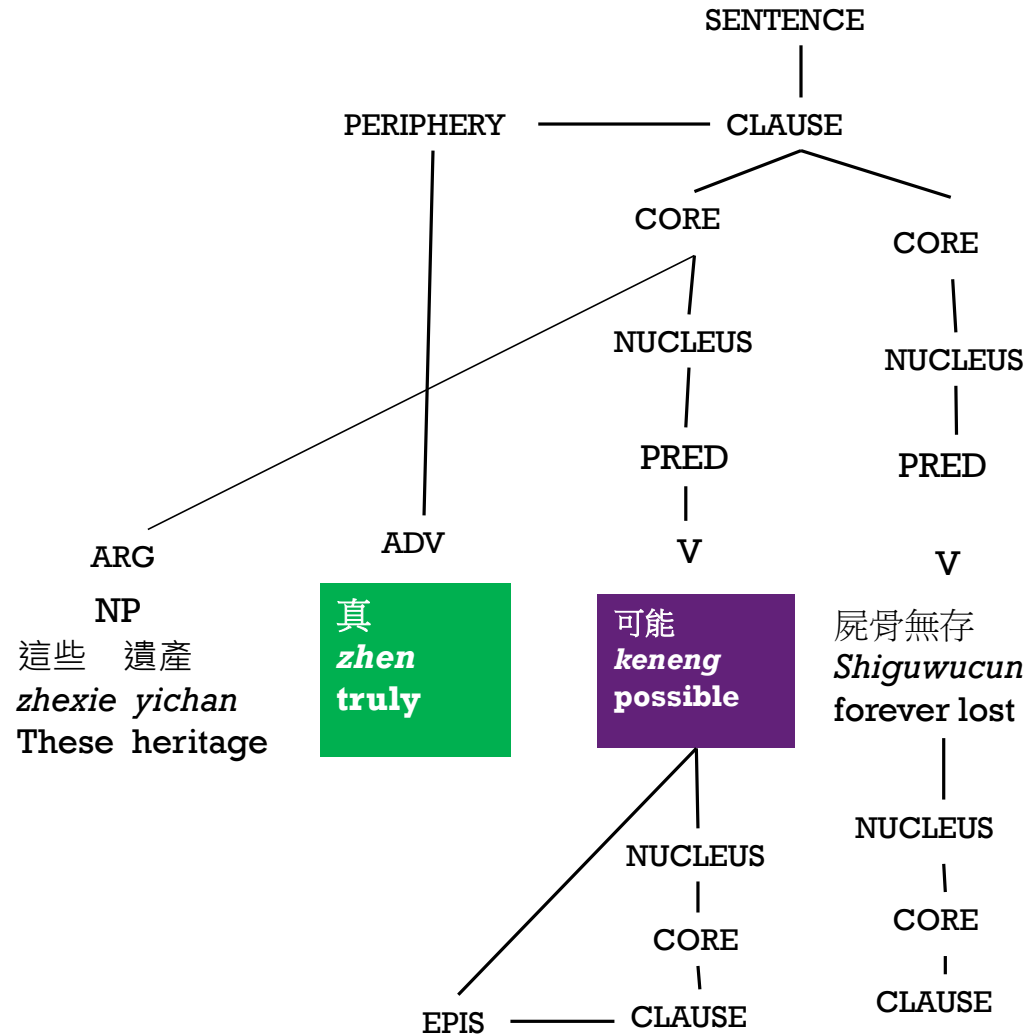

zhen, 'truly': Clause

“These heritage **truly** seemed to be lost forever.”

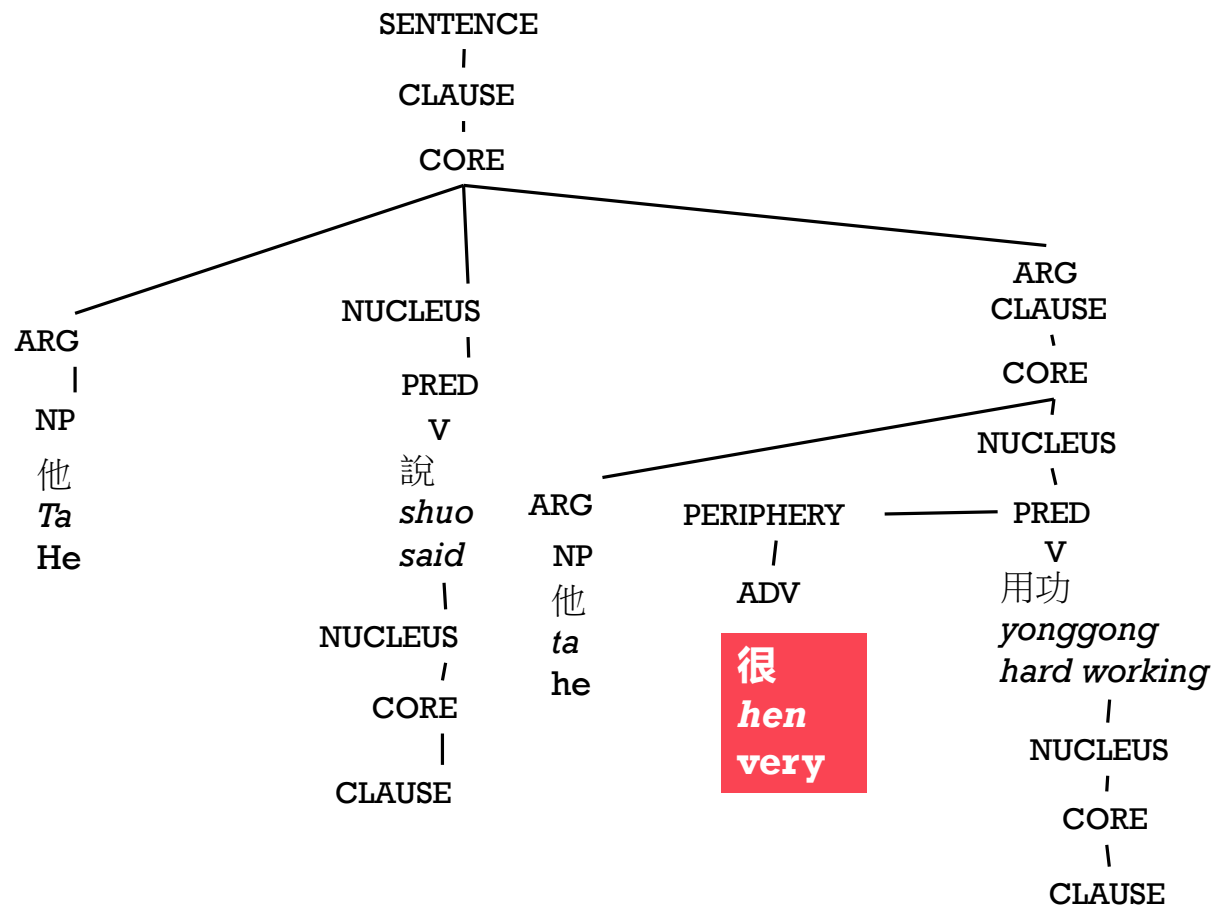

hen, 'very': Nucleus

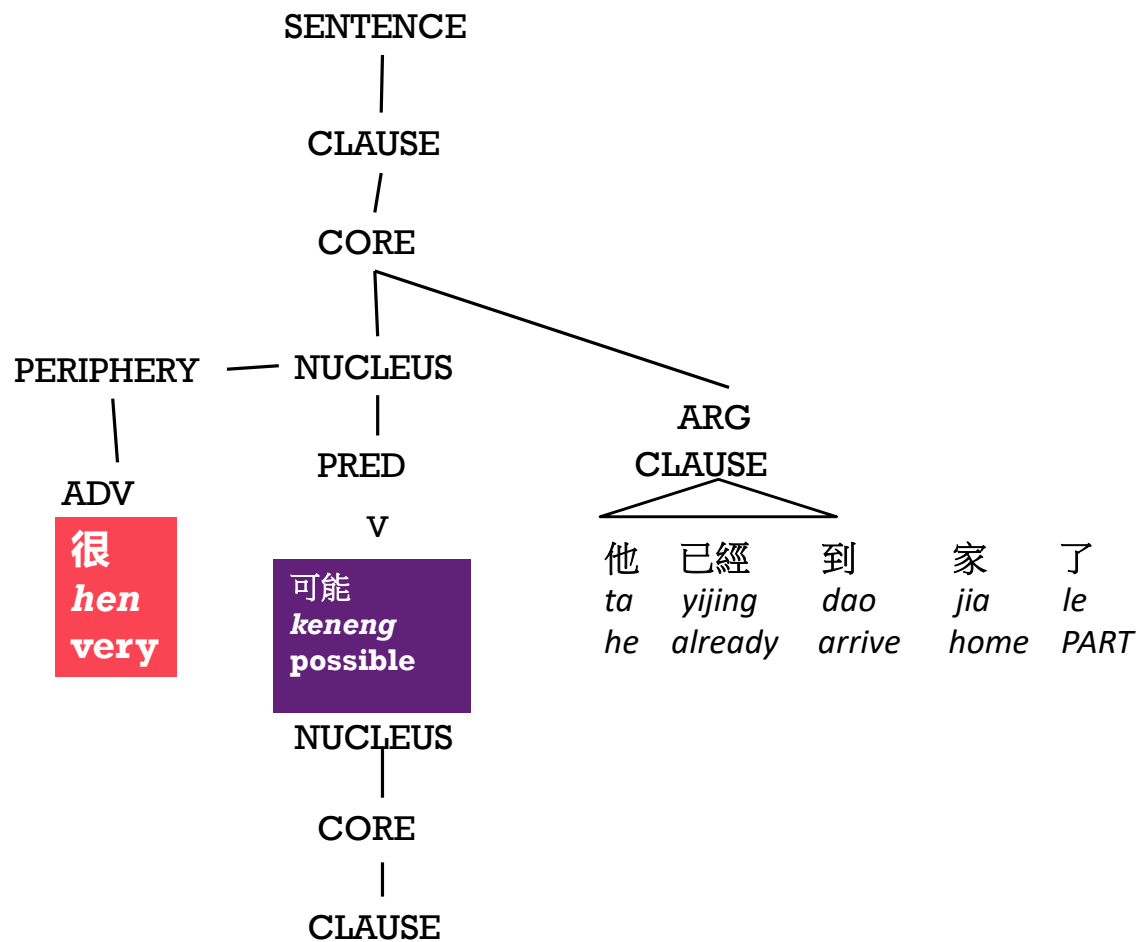

“He said that he was **very** hard-working.”

18

“It is **highly possible** that he already got home”

19

zhende, 'really': 1. Core 2. Clause

Ambiguous

AI

真的
zhende
really

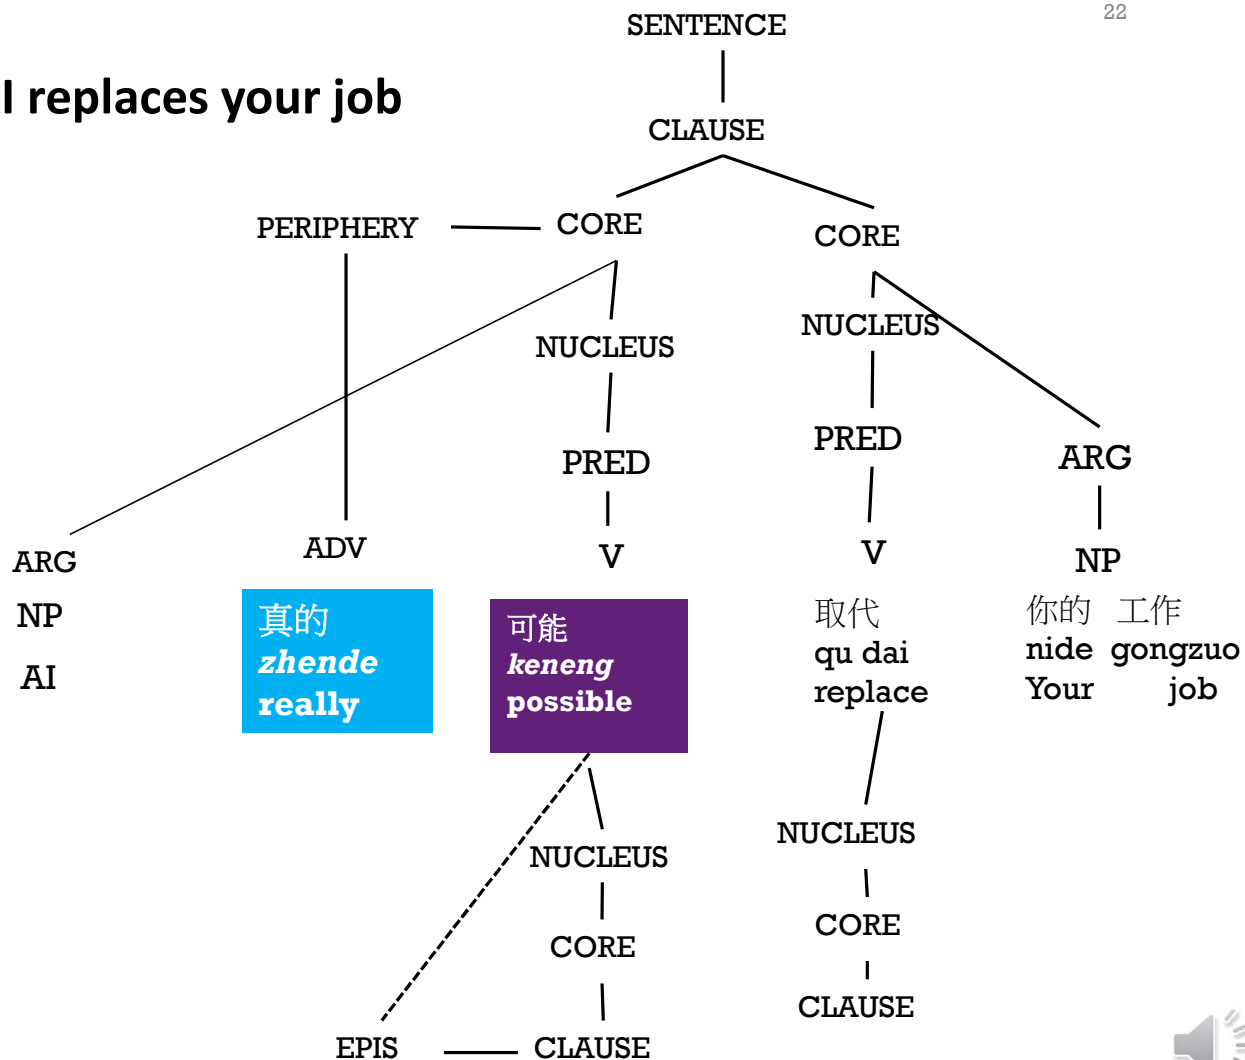

可能
keneng
possible

取代 你的 工作
qudai nide gongzuo
replace your job

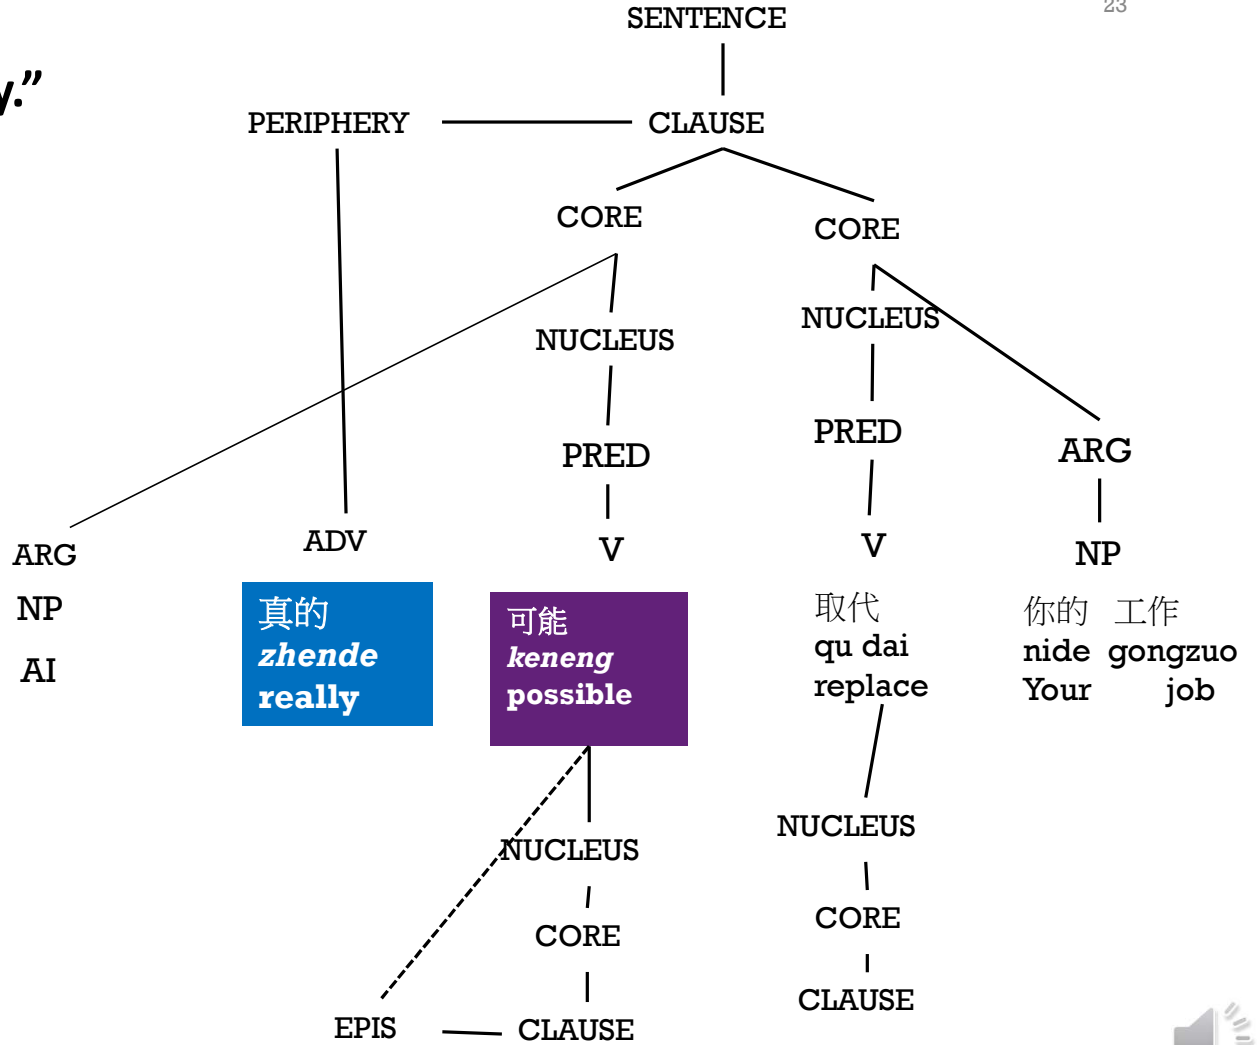

“AI really could replace your job.”

➔ There is a high possibility that AI replaces your job

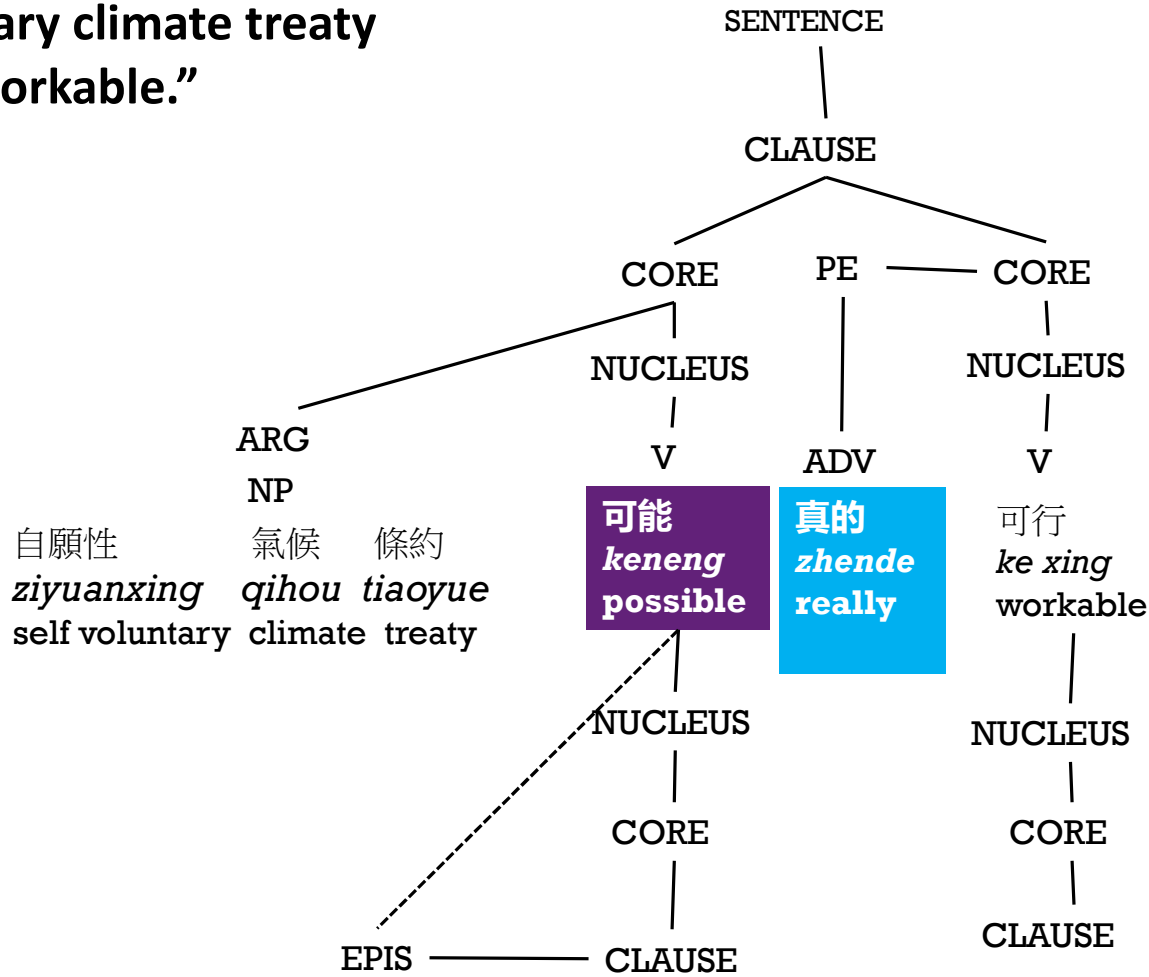

“AI really could replace your job.”
 → “AI could replace your job, really.”

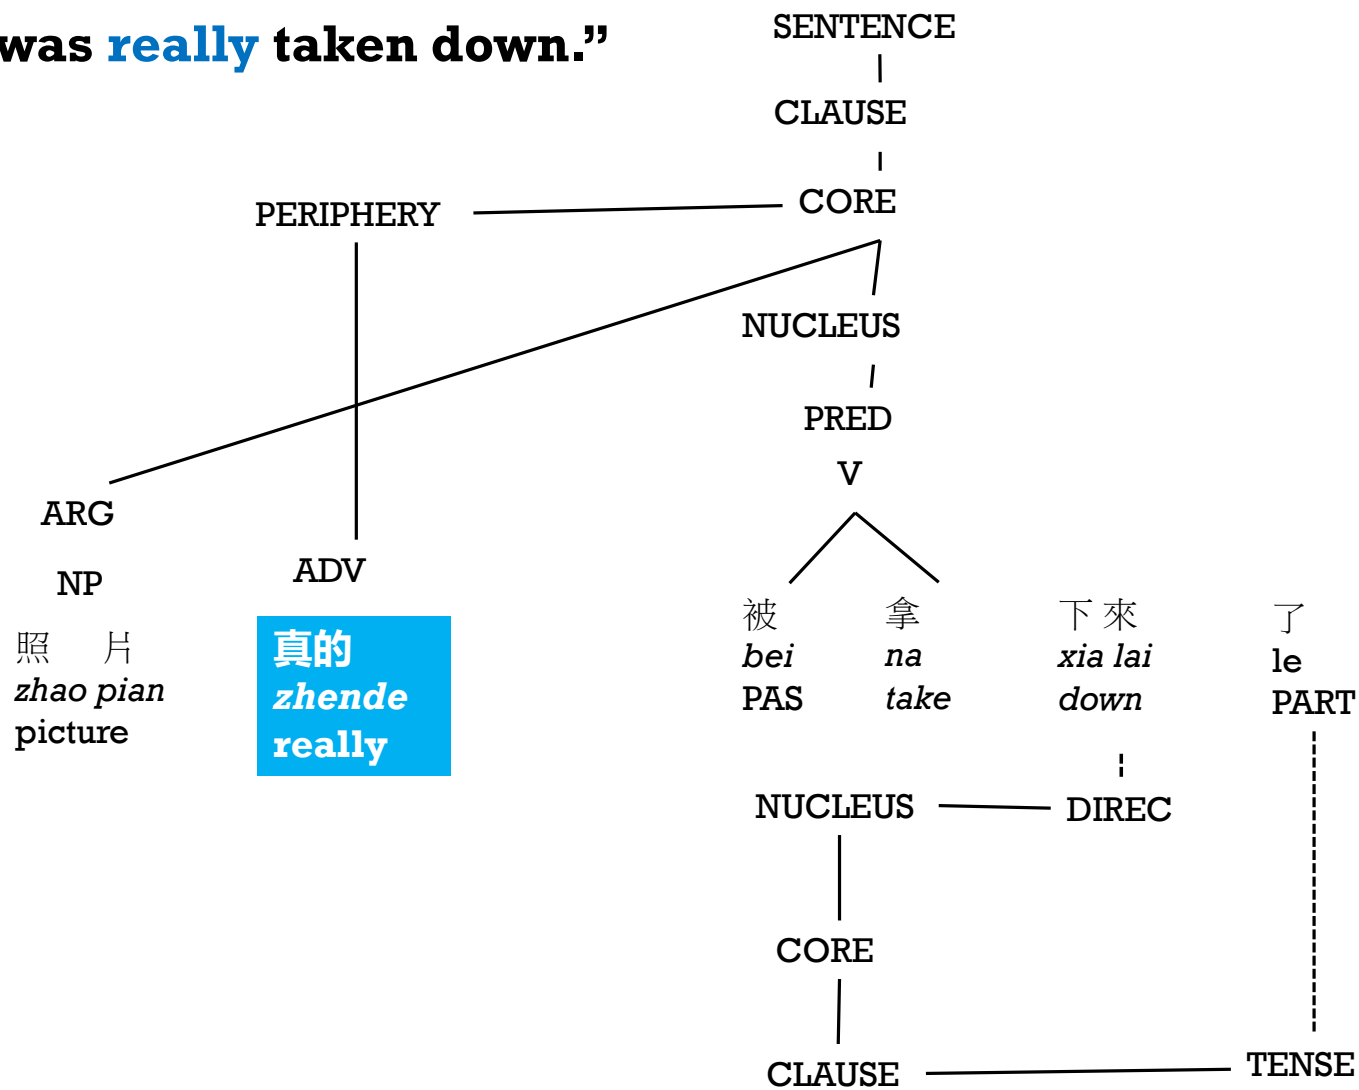

zhende modifying
the core layer

“The self voluntary climate treaty
seemed really workable.”

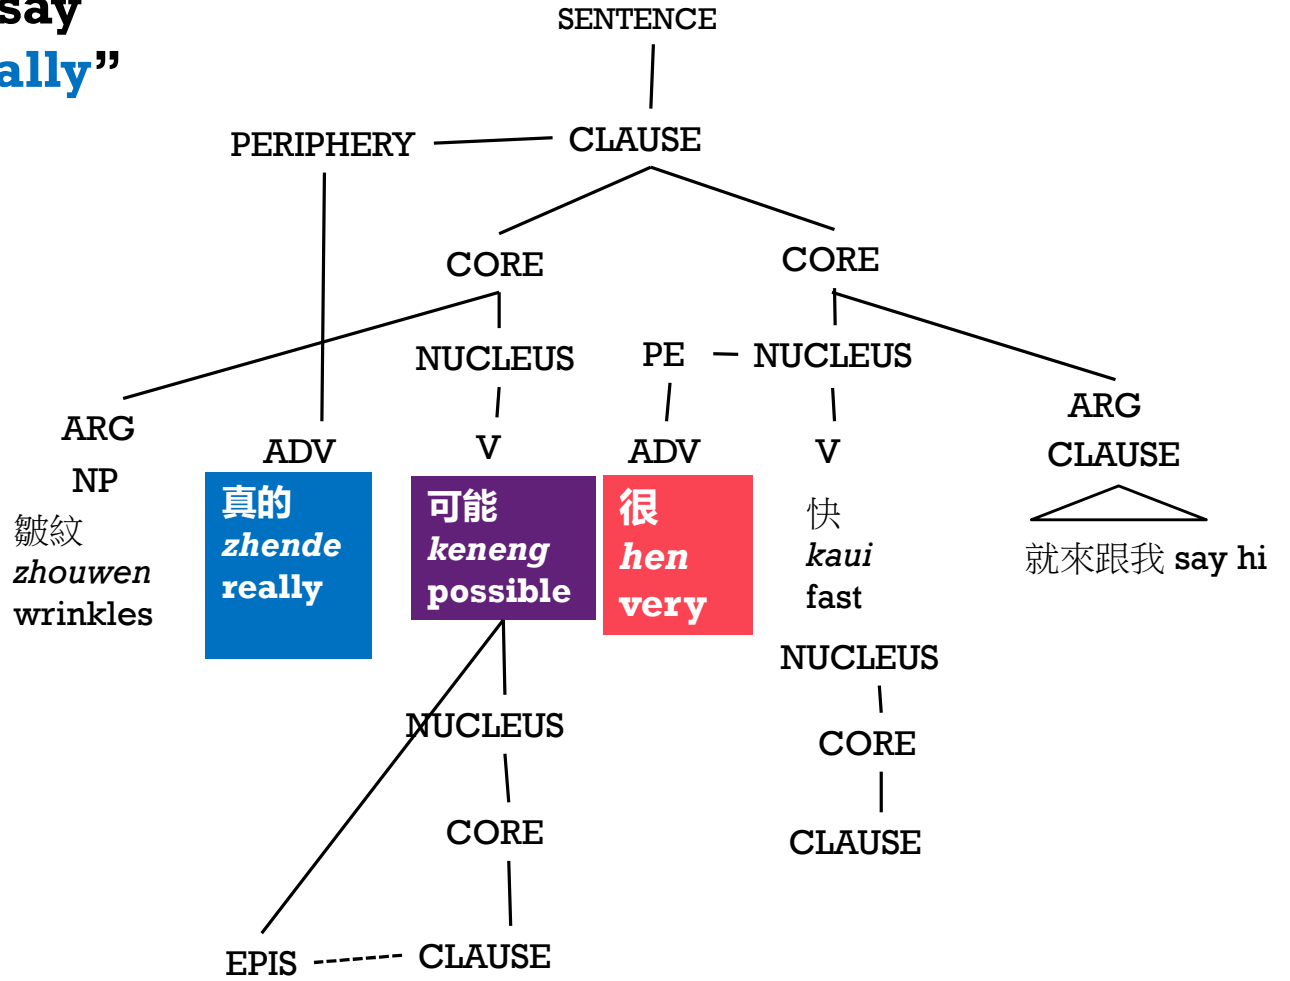

“The picture was **really** taken down.”

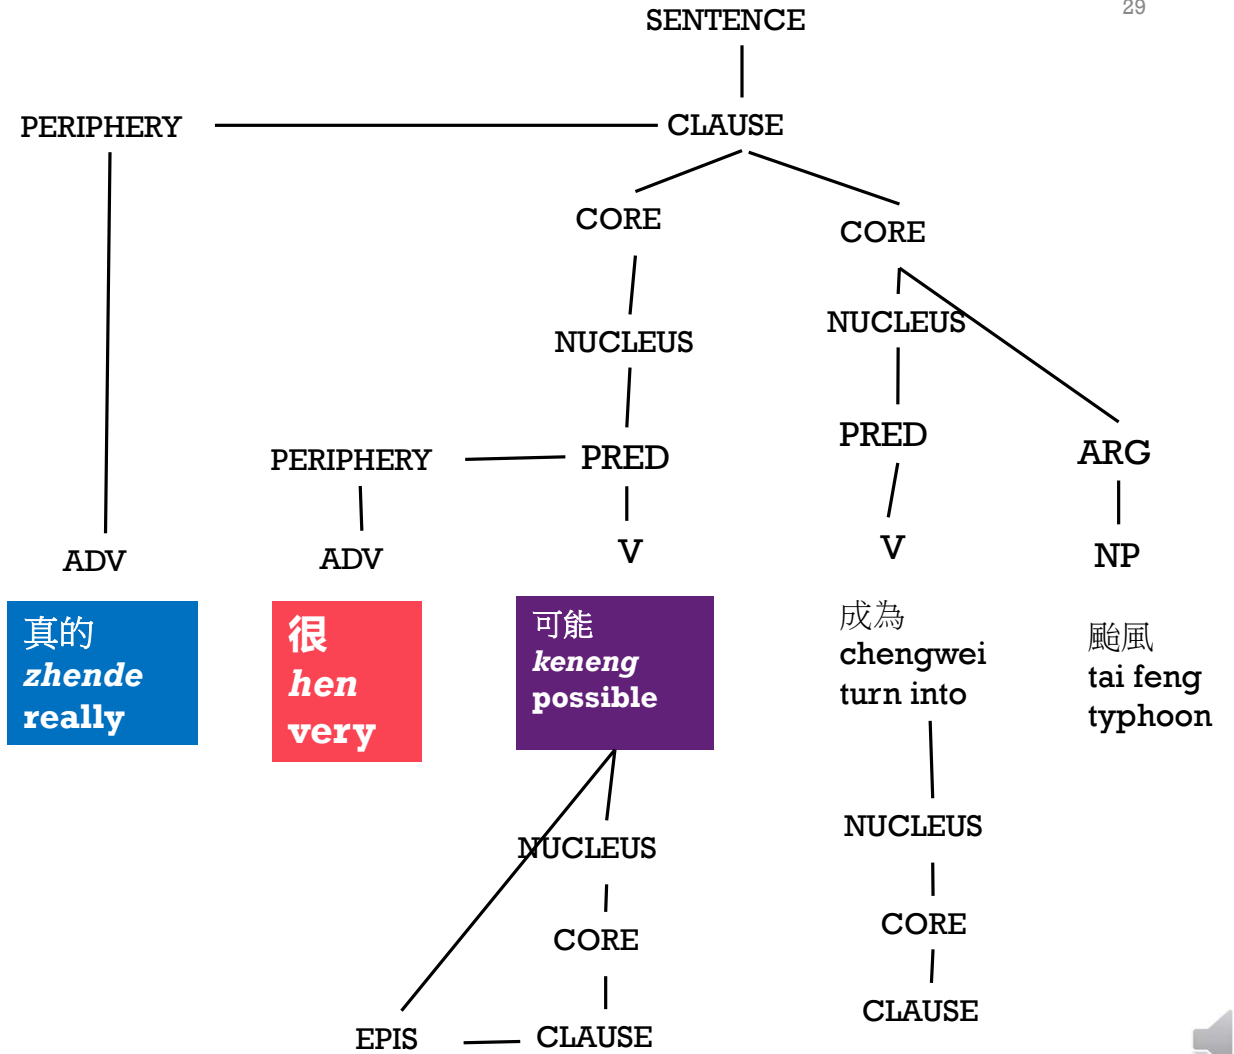

zhende modifying
the clause layer

“Wrinkles seemed to “say hi” to me **very** soon, **really**”

“It is **highly** possible that typhoon will form, **really**”

Classification
summary

Constructions	Modifying layers
<i>zhen</i>	clause
<i>zhende-clause</i>	clause
<i>zhende-core</i>	core
<i>hen</i>	nucleus

Procedure

Procedures

1. Collecting data from PTT gossiping board (total:4323 characters)
2. Cleaning and parsing the data into utterance level
3. Rating each utterance
4. Analyzing the utterances using One-way ANOVA

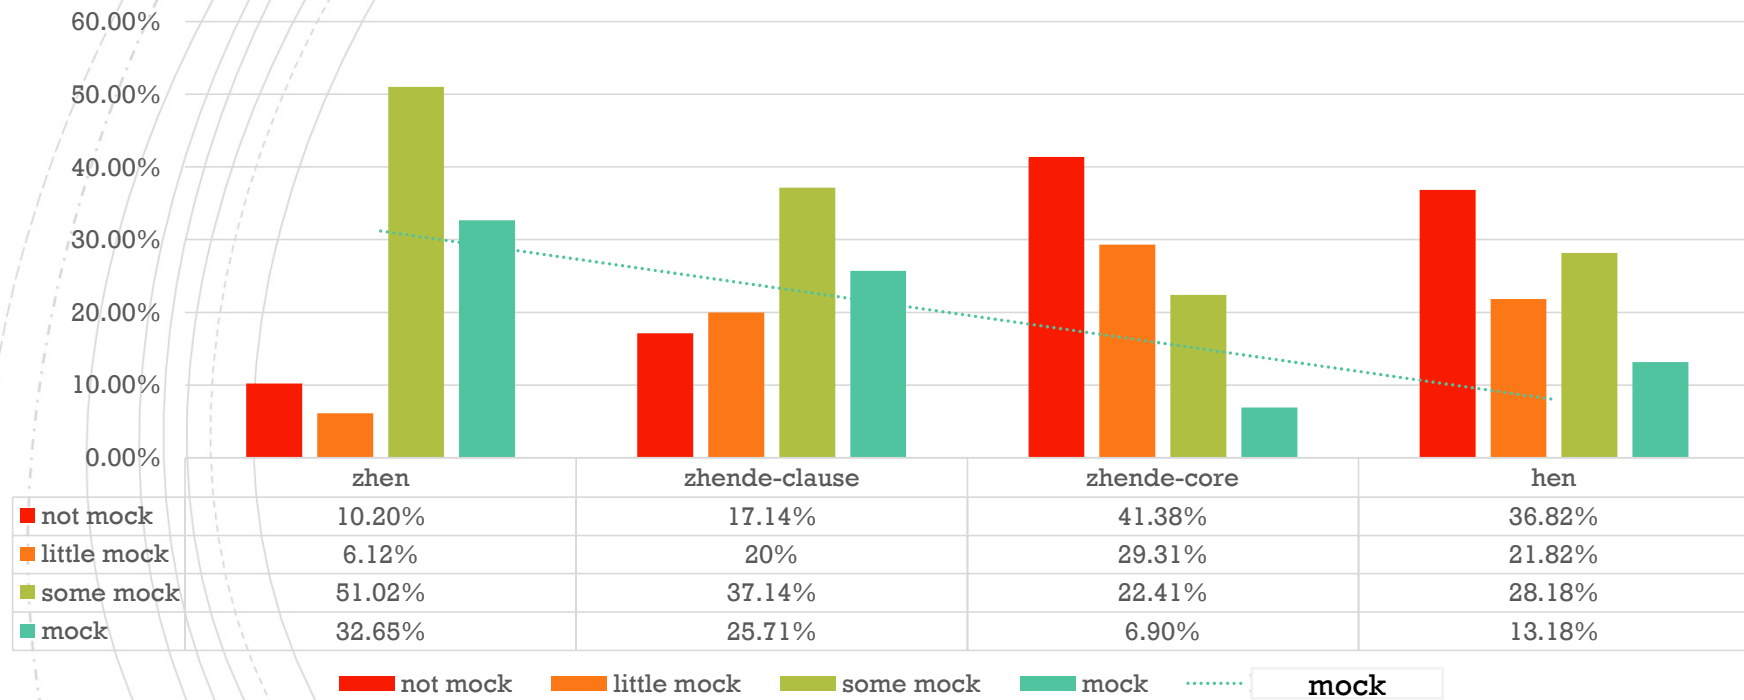

Utterances	rater1	rater2	rater3	score	Mock degree
“So you just want his money.You are such a cultured person.”	o	o	o	3	mock
“How poor boyfriend is.”	o	o	x	2	Some mock
“Being rich and not stingy is rare enough.”	o	x	x	1	Little mock
“Seeing what have been commented, it is possible that the car dealer heard the word wrong. I mean, a “camping car” does sound like a “hearse.”	x	x	x	0	Not mock

Results and Discussion

RQ1: Can different intensifiers with similar meanings express different degree of mock politeness?

RQ1: Can different intensifiers with similar meanings express different degree of mock politeness?

	group	n	mean	sd
1	<i>hen</i>	194	1.1340206	1.0640510
2	<i>zhen</i>	49	2.0612245	0.8992627
3	<i>zhende-clause</i>	35	1.7142857	1.0451971
4	<i>zhende-core</i>	58	0.9482759	0.9628615

- The Welch's ANOVA shows that the four constructions have a significant difference in terms of raters' scores ($F = 17.375, p < .001$).

RQ2: Which of the three intensifiers, *zhen* 'truly', *zhende* 'really' and *hen* 'very', are more frequently used to express mock politeness? Why?

- *Zhen* construction, *zhende-clause* > *zhende-core* construction, *hen* construction.
- Finding: If the intensifier could modify the clause layer, it is more likely the intensifier construction could show mock politeness.

Possible
explanation for
the finding

- It seems that when an adverb could modify a higher layer, it is more related to “mood.” (Van Valin, 2005)
 - Nucleus: Aspectual adverbs, ‘completely’
 - **Core:** pace adverbs, ‘quickly,’
deontic adverbs, ‘can’
 - **Clause:** epistemic adverbs, ‘probably.’

Conclusion

- RQ1: Can different intensifiers express different degree of mock politeness?
 - YES
- RQ2: Which of these intensifiers are more frequently used to express mock politeness? Why?
 - *Zhen* and *zhende-clause*
 - The layer the intensifier is modifying could influence how much attitude (mock politeness) is shown.

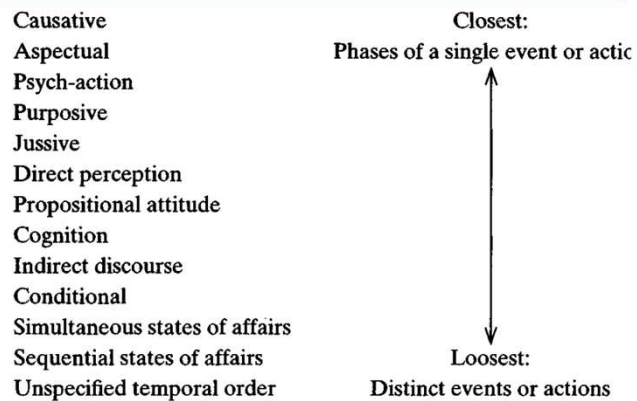

Figure 8.17 Interclausal Semantic Relations Hierarchy

- 1. Could we use interclausal semantic relations hierarchy to explain the phenomenon?
- 2. Other intensifiers, such as *tai* ‘too’ (太), *hao* ‘very’ (好), and *man* ‘very’ (滿), could be further investigated.
